

# MTS/T-BERD Platforms

## Ultra Long Haul OTDR Module

### Key Features

- Highest dynamic range with 50dB at 1550nm using a 20µs pulsewidth
- Best resolution/dynamic range compromise for accurate medium range measurement
- High performance testing (up to 128,000 acquisition points with 0.1 s real time sweep)
- Complete fiber characterization solution combining CD, PMD, and spectral attenuation testing capability in the MTS/T-BERD platform

### The industry's first true 50dB OTDR

The Ultra Long Haul (UHD) Optical Time Domain Reflectometer (OTDR) Module range provides the highest performance of any OTDR field instrument on the market.

The UHD OTDR testing capability, at wavelengths between 1310/1550/1625nm, delivers the highest dynamic range, the fastest speed, and the greatest accuracy for the installation and maintenance of optical fiber networks.

### Multi-purpose application OTDR

Designed for very long distance testing, the UHD OTDR Module is also an essential tool when accuracy and testing speed are required in medium haul network measurements.

### A powerful solution

The UHD OTDR Module's automation and rapid testing features offer impressive time savings for companies involved in commissioning and locating faults in optical fiber networks.

Housed in the MTS/T-BERD platform, the UHD OTDR testing solution offers a lightweight, handheld, and rugged field instrument suitable for any OTDR measurement constraints.

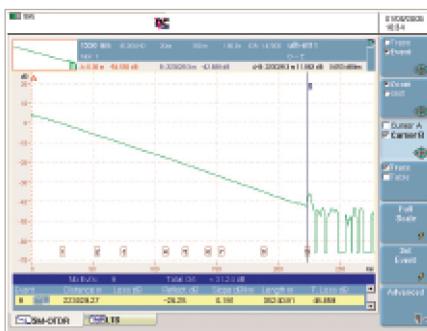

Figure 1 Ultra Long Haul network testing with the UHD OTDR module with a 20  $\mu$ s pulsewidth

## Rugged field solution

Housed in the field dedicated MTS/T-BERD platform, OTDR measurements can be performed in Outside Plant (OSP), Central Office (CO), and harsh environmental conditions. This portable, battery-powered instrument is shockproof and drop tested for complete reliability in the field.

## Enhanced testing time

The full dynamic range is reached in less than 30 seconds measurement time, allowing greater productivity in the field and faster return on investment.

## Dedicated for very long haul networks

Transmission systems reach longer and longer distances, requiring high performance test solutions for characterization. Very long haul terrestrial and subterranean networks require OTDR solutions capable of providing the longest, most accurate measurements possible. The UHD OTDR Module offers this compromise where 50dB dynamic range is reached at 1550nm with only a 20 $\mu$ s pulsewidth, keeping sensible dead zones and optimum linearity.

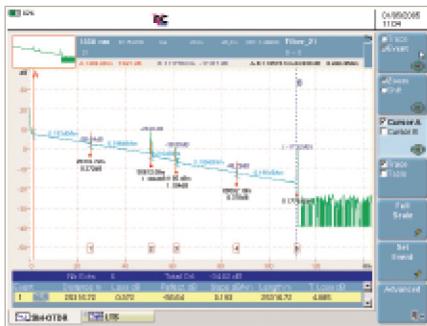

Figure 2 Very fast (<20s) Medium haul network testing with the UHD OTDR module with 1μs pulsewidth

## Also for medium range distances

Due to the important step-up in dynamic range, the UHD OTDR Module allows the technician to test the same fiber length with considerably reduced pulsewidths, compared to existing OTDRs. This dramatically improves the accuracy by shortening the attenuation dead zone, resulting in better event pinpoints, distance location, and loss measurement.

## OTDR Bellcore/Telcordia Trace format compatible

The UHD OTDR Module complies with GR-196-CORE issue 2, OTDR data standard revision 1.0/1.1/2.0. It is also fully compatible with the universal file exchange and export format.

## FiberCable Software Solution

The PC-based software range, presented in a true Windows environment, offers a complete and detailed post-analysis OTDR results capability as well as the generation of professional acceptance reports.

# 3

## Technical Specifications – MTS/T-BERD Base unit (typical at 25°C)

### UHD OTDR Module technical specifications (Typical at 25°C)

#### OTDR characteristics

Distance units	Kilometers, feet an miles
Group index range	1.30000 to 1.70000 in 0.00001 steps
Number of data points	Up to 128 000 data points
Distance measurement	
Automatic or dual cursor	
Display span	From 2.6 m up to 380km range
Display resolution	1 cm
Cursor resolution	From 1 cm
Sampling resolution	From 4 cm
Accuracy	$\pm 1 \text{ m} \pm \text{sampling resolution}$ $\pm 1.10\text{-}5 \times \text{Distance}$ (Excluding group index uncertainties)

#### Attenuation measurement

Automatic, manual, 2-point, 5-point and LSA	
Display span	From 1.25 dB to 55 dB
Display resolution	0.001 dB
Cursor resolution	From 0.001 dB
Accuracy	$\pm 0.05 \text{ dB} \pm 0.05 \text{ dB}/\text{dB}$
Threshold	0.01 to 5.99 dB in 0.01 dB step

#### Reflectance/ORL measurements

Automatic or manual	
Display resolution	0.01 dB
Threshold	-11 to -99 dB in 1 dB step
Storage	Bellcore/Telcordia compatible Version 1.1 and Version 2.0

### Ordering information

#### UHD OTDR Modules

Ultra Long Range 1550nm Module	E8115UHD
Ultra Long Range 1310/1550 nm Module	E8126UHD
Ultra Long Range 1550/1625 nm Module	E8129UHD
Ultra Long Range 1310/1550/1625 nm Module	E8136UHD

### OTDR Module technical specifications (typical at 25°C)

	Central wavelength <sup>1</sup>	1310nm $\pm 20$ nm	1550nm $\pm 20$ nm	1625nm $\pm 10$ nm
Laser safety class (21 CFR)		Class 1		
Pulsewidth		10 ns to 20 $\mu$ s		
Distance range		Up to 380 km		
RMS dynamic range <sup>2</sup>		46 dB	50 dB	46 dB
Event dead zone <sup>3</sup>		4 m	4 m	4 m
Attenuation dead zone <sup>4</sup>		15 m	15 m	15 m

1 Central wavelength: Laser at 25°C and measured at 10  $\mu$ s for singlemode and 50 ns for multimode

2 RMS dynamic range: The one way difference between the extrapolated backscattering level at the start of the fiber and the RMS noise level, after 3 minutes averaging.

3 Event dead zone: Measured at  $\pm 1.5$  dB down from the peak of an unsaturated reflective event.

4 Attenuation dead zone: Measured at  $\pm 0.5$  dB from the linear regression using a FC/PC type reflectance.
